

# FM060-5-EM

FlexPro® Series

**Product Status:** Active

# **SPECIFICATIONS**

Current Peak 10 A
Current Continuous 5 A

DC Supply Voltage 10 – 55 VDC Network Communication EtherCAT

The **FM060-5-EM** is a single-axis servo drive and integration board assembly for a FE060-5-EM FlexPro® series servo drive with IMPACT<sup>TM</sup> architecture. Connections to the controller, motor, power, and feedback are simplified through the standard connectors featured on the board.

The **FM060-5-EM** offers full tuning control of all servo loops and is designed to drive brushed and brushless servo motors, and closed loop stepper motors. The drive accepts a variety of external command signals, or can use the built-in Motion Engine, an internal motion controller used with Sequencing and Indexing commands. Programmable digital and analog I/O are included to enhance interfacing with external controllers and devices.

The **FM060-5-EM** utilizes EtherCAT® network communication using CANopen over EtherCAT (CoE) and is configured via USB. All drive and motor parameters are stored in non-volatile memory.

IMPACT<sup>TM</sup> (Integrated Motion Platform And Control Technology) combines exceptional processing capability and high-current components to create powerful, compact, feature-loaded servo solutions. IMPACT<sup>TM</sup> is used in all FlexPro<sup>®</sup> drives and is available in custom products as well.

# **FEATURES**

- CoE Based on DSP-402 Device Profile for Drives and Motion Control
- Synchronization using Distributed Clocks
- Position Cycle Times down to 100us
- Four Quadrant Regenerative Operation
- Programmable Gain Settings
- PIDF Velocity Loop

- On-the-Fly Mode Switching
- On-the-Fly Gain Set Switching
- Compact Size, High Power Density
- Dedicated Safe Torque Off (STO) Inputs
- Bridge Status, Fault and Network Status LEDs
- Standard Connections for Easy Setup

# **BLOCK DIAGRAM**

# **INFORMATION ON APPROVALS AND COMPLIANCES**

US and Canadian safety compliance with UL/IEC 61800-5-1, the industrial standard for adjustable speed electrical power drive systems. UL registered under file number E140173. Note that machine components compliant with UL are considered UL registered as opposed to UL listed as would be the case for commercial products.

Compliant with European EMC Directive 2014/30/EU on Electromagnetic Compatibility (specifically EN 61000-6-4:2007/A1:2011 for Emissions, Class A and EN 61000-6-2:2005 for Immunity, Performance Criteria A). LVD requirements of Directive 2014/35/EU (specifically, EN 60204-1:2019, a Low Voltage Directive to protect users from electrical shock).

The RoHS Directive restricts the use of certain substances including lead, mercury, cadmium, hexavalent chromium and halogenated flame retardants PBB and PBDE in electronic equipment.

- 1. Capable of supplying drive rated peak current for 2 seconds with 10 second foldback to continuous value. Longer times are possible with lower current limits.
- 2. Continuous A<sub>ms</sub> value attainable when RMS Charge-Based Limiting is used.

  3. Applications with a supply voltage higher than 30VDC require a minimum external decoupling capacitance of 470µF / 100V added across HV and POWER GND.

  4. Lower inductance is acceptable for bus voltages well below maximum. Use external inductance to meet requirements.
- 5. EtherCAT® is a registered trademark and patented technology, licensed by Beckhoff Automation GmbH, Germany.
- 6. Maximum motor speed for stepper motors is 600 RPM. Consult the hardware installation manual for 2-phase stepper wiring configuration.
- 7. Additional cooling and/or heatsink may be required to achieve rated performance.

# PIN FUNCTIONS

P1 – EtherCAT Communication Connector			
Pin	Name	Description / Notes	I/O
1	RX+ IN	Receiver + (100Base-TX)	I
2	RX- IN	Receiver - (100Base-TX)	I
3	TX+ IN	Transmitter + (100Base-TX)	I
4	TX- IN	Transmitter - (100Base-TX)	I
5	GND	Ground	GND
6	RX+ OUT	Receiver + (100Base-TX)	
7	RX- OUT	Receiver - (100Base-TX)	
8	TX+ OUT	Transmitter + (100Base-TX)	
9	TX- OUT	Transmitter - (100Base-TX)	
10	GND	Ground	
11	ECAT_ERROR LED	Error Indicator for EtherCAT Network for optional external user LED connection.	
12	ECAT_STATUS LED	Run State Indicator for EtherCAT Network for optional external user LED connection.	

12 LC/(I_SI/(IOS LLD	Kon state indicator for E
Connector Information	12-pin, 1.0mm, spaced single row vertical header
Mating Connector Details	Molex: 5013301200
Mating Connector Included	No

# **BOARD CONFIGURATION**

# **Status LED Functions**

LED	Description
STAT	Indicates drive power bridge status. GREEN when DC bus power is applied and the drive is enabled. RED when the drive is in a fault state.
LOGIC PWR	Indicates that +5V logic power is available to the drive. GREEN when +5V logic power is available.

## **Communication Status LED Functions**

LED	Description		
	Green – On	Valid Link - No Activity	
LINK/ACT IN/OUT	Green – Flickering	Valid Link - Network Activity	
	Off	Invalid Link	
	Green – On	The device is in the state OPERATIONAL	
	Green – Blinking (2.5Hz – 200ms on and 200ms off)	The device is in the state PRE-OPERATIONAL	
	Green – Single Flash (200ms flash followed by 1000ms off)	The device is in state SAFE-OPERATIONAL	
		The device is booting and has not yet entered the INIT state	
ETHERCAT STATUS		or	
	Green – Flickering (10Hz – 50ms on and 50ms off)	The device is in state BOOTSTRAP	
		or	
		Firmware download operation in progress	
	Off	The device is in state INIT	
	Red - On	A PDI Watchdog timeout has occurred.	
	Red Off	Example: Application controller is not responding anymore.	
		General Configuration Error.	
	Red – Blinking (2.5Hz – 200ms on and 200ms off)	Example: State change commanded by master is impossible due to register or object settings.	
		Booting Error was detected. INIT state reached, but parameter	
	Red – Flickering (10Hz – 50ms on and 50ms off)	"Change" in the AL status register is set to 0x01:change/error	
ERROR		Example: Checksum Error in Flash Memory.	
		The slave device application has changed the EtherCAT state	
		autonomously: Parameter "Change" in the AL status register is	
	Red – Single Flash (200ms flash followed by 1000ms off)	set to 0x01:change/error.	
		Example: Synchronization error; device enters SAFE-	
		OPERATIONAL automatically	
	Red – Double Flash (Two 200ms flashes separated by 200ms off,	An application Watchdog timeout has occurred.	
	followed by 1000ms off)	Example: Sync Manager Watchdog timeout.	

# **Address Selection**

The drive Station Alias is set via the EtherCAT network or with the setup software. Note that drives on an EtherCAT network will be given an address automatically based on proximity to the host.

## Safe Torque Off (STO) Inputs

The Safe Torque Off (STO) inputs are dedicated +5VDC sinking single-ended inputs. For applications not using STO functionality, disabling of the STO feature is required for proper drive operation. STO may be disabled by following the STO Disable wiring instructions as given in the hardware installation manual.

# **Mating Connector Kit**

Mating connector housing and crimp contacts can be ordered as a kit using ADVANCED Motion Controls' part number KC-MC1XFM01. This includes mating connector housing and crimp style contacts for the Communication, I/O and Logic, and Feedback connectors. The recommended tool for crimping the contacts is Molex PN: 63819-1500 (not included with the kit).

ADVANCED Motion Controls also has the capability to promptly develop and deliver specified products for OEMs with volume requests. Our Applications and Engineering Departments will work closely with your design team through all stages of development in order to provide the best servo drive solution for your system. Equipped with on-site manufacturing for quick-turn customs capabilities, ADVANCED Motion Controls utilizes our years of engineering and manufacturing expertise to decrease your costs and time-to-market while increasing system quality and reliability.

# **Examples of Customized Products**

- Optimized Footprint
- Private Label Software
- OEM Specified Connectors
- ▲ No Outer Case
- ▲ Increased Current Resolution
- ▲ Increased Temperature Range
- Custom Control Interface
- ✓ Integrated System I/O

- ▲ Tailored Project File
- ▲ Silkscreen Branding
- Optimized Base Plate
- Increased Current Limits
- ▲ Increased Voltage Range
- Conformal Coating
- ▲ Multi-Axis Configurations
- Reduced Profile Size and Weight

Feel free to contact us for further information and details!

# **Available Accessories**

ADVANCED Motion Controls offers a variety of accessories designed to facilitate drive integration into a servo system. Visit <a href="https://www.a-m-c.com">www.a-m-c.com</a> to see which accessories will assist with your application design and implementation.
